Morgan Poll shows ALP (50.5%) holds slight lead over L-NP (49.5%) as Prime Minister Tony Abbott visits Indonesia

The ALP (50.5%, up 1% since the Morgan Poll of September 21/22, 2013) now leads the L-NP (49.5%, down 1%) on a two-party preferred basis according to the multi-mode Morgan Poll conducted last weekend (October 5/6, 2013) on Federal voting intention with an Australia-wide cross-section of 3,199 Australian electors aged 18+.

The L-NP primary vote is 42% (down 1.5%), ahead of the ALP primary vote at 37% (up 3%).

Among the minor parties Greens support is 9% (down 1.5%), support for the Palmer United Party is 4.5% (up 0.5%) and support for Independents/Others is 7.5% (down 0.5%).

Analysis by Gender

Analysis by Gender shows Women favour the ALP 53.5% (up 1% since September 21/22, 2013) cf. L-NP 46.5% (down 1%) on a two party preferred basis and Men favour the L-NP 52.5% (down 1%) cf. ALP 47.5% (up 1%).

The Roy Morgan Government Confidence Rating is now at 113.0 up 2pts since September 21/22, 2013. Now 42% (unchanged) of Australians say Australia is 'heading in the right direction' and 29% (down 2%) say Australia is 'heading in the wrong direction'.

The Morgan Poll surveys a larger sample (including people who only use a mobile phone) than any other public opinion poll.

Gary Morgan says:

"Tony Abbott's first trip abroad hasn't helped the new Government's standing in the community with the ALP (50.5%, up 1% since September 21/22, 2013) now ahead of the L-NP (49.5%, down 1%) on a two-party preferred basis only one month after a convincing election victory for the Coalition.

"Although media commentary has been supportive of Abbott's diplomacy in meeting Indonesian leaders including Indonesian President Susilo Bambang Yudhoyono (SBY) and a renewed commitment to working closely with Indonesia on dealing with the contentious issue of asylum seekers, these efforts have not led to a rise in community support for the Coalition.

"The issue of asylum seekers was again brought to our national attention last week after an asylum seeker boat sank off the Indonesian coast with dozens of asylum seekers feared drowned. A special Morgan Poll conducted in June showed a clear majority of Australian electors (59%) think asylum seekers arriving by boat should be returned and made to apply through normal refugee channels.

*"Today's Morgan Poll may also reflect a more general wariness Australians have regarding Indonesia. When Roy Morgan asked Australians whether they would be 'more likely' or 'less likely' to buy goods from Indonesia, a clear majority of Australians (58%) say they would be 'less likely' to buy goods made in Indonesia compared to only 11% of Australians that say they would be 'more likely' to buy goods made in Indonesia. **Perhaps the most surprising point to note about today's result is that the ALP has yet to elect it's new leader since its Federal Election loss.**"*

Electors were asked: "If an election for the House of Representatives were held today - which party will receive your first preference?"

Phone: Telephone survey method; Face: Face-to-face survey method. *Roy Morgan GCR = Roy Morgan Government Confidence Rating (100 plus the difference between the percentage of people who say the country is “going in the right direction” and the percentage who say the country is “going in seriously the wrong direction”).

Margin of Error

The margin of error to be allowed for in any estimate depends mainly on the number of interviews on which it is based. The following table gives indications of the likely range within which estimates would be 95% likely to fall, expressed as the number of percentage points above or below the actual estimate. The figures are approximate and for general guidance only, and assume a simple random sample. Allowance for design effects (such as stratification and weighting) should be made as appropriate.

Sample Size	Percentage Estimate			
	40%-60%	25% or 75%	10% or 90%	5% or 95%
500	±4.5	±3.9	±2.7	±1.9
1,000	±3.2	±2.7	±1.9	±1.4
1,500	±2.6	±2.2	±1.5	±1.1
2,000	±2.2	±1.9	±1.3	±1.0

Morgan Poll Accuracy — Recent Elections State & Federal (2006 – 2013)

The Morgan Poll has proven to be consistently the most accurate regular poll in recent Australian Elections — including the 2013 Federal Election, 2010 Federal Election, 2007 Federal Election, 2010 Victorian State Election & 2012 Queensland State Election.

The **Morgan Poll** was the most accurate of all polling companies at [the 2013 Federal Election](#) for the two-party preferred vote (L-NP: 53.5% cf. ALP 46.5%) (sample 4,937 electors).

The **Morgan Poll** was the most accurate of all polling companies at [the 2007 Federal Election](#) for both primary vote and two-party preferred predictions (sample 2,115 electors).

The **Morgan Poll** accurately predicted [that the ALP would win the 2006 Queensland Election with a reduced majority](#) (sample 604 electors).

The **Morgan Poll** accurately predicted [that the ALP would win the 2006 Victorian Election with a reduced majority](#) (sample 956 electors). The **Morgan Poll** was also the most accurate on the primary vote of the major parties for the Victorian election.

Note: The [discussion on Possum Pollytics](#) regarding Morgan and Newspoll is well worth reading.

The following included comment says it all: “I find it interesting that for the only poll in the last five years for which there is any ‘real’ figure with which to compare, i.e. the polls immediately before the 2004 election, Morgan (45.5%) was closer to the actual Coalition Primary (46.7%) than Newspoll (45%) or Nielsen (49%), and Morgan (38.5%) was also closer to the ALP actual primary (37.6%) than Newspoll (39%), and only marginally further away than Nielsen (37%). Since we have no idea of how far away the ongoing polls are from ‘reality’ (whatever that means), surely we should just go with what we know, that in the most recent testable case, Morgan was better at forecasting the actual primary vote than Newspoll. On what possible basis should we decide that the Newspoll or Nielsen primary vote estimate is ‘better’ than Morgan’s.”
