

Monday, 24 March 2014

**ALP (54.5%) biggest lead over L-NP (45.5%) since losing the Election after ALP win narrowly in SA and L-NP win in Tasmania;
ALP (52%) leads L-NP (48%) in WA before special WA half-Senate Election**

If a Federal Election were held today it would result in an ALP victory - two-party preferred support is ALP 54.5% (up 1% since the Morgan Poll of March 1/2 & 8/9, 2014) cf. L-NP 45.5% (down 1%) according to the Morgan Poll. This multi-mode Morgan Poll on voting intention was conducted over the last two weekends (March 15/16 & 22/23, 2014) with an Australia-wide cross-section of 2,909 Australian electors aged 18+.

The ALP primary vote is 38.5% (up 1.5%) now ahead of the L-NP 38% (down 1.5%) for the first time since last year's September Election.

Among the minor parties Greens support is 11% (down 1%), support for the Palmer United Party (PUP) is 4.5% (up 0.5%) and support for Independents/Others is 8% (up 0.5%). Support for PUP is highest in Western Australia (10.5%) – which faces a Senate election in under two weeks.

Analysis by Gender

Analysis by Gender shows that ALP support is still strongest amongst women with the ALP (57%, unchanged since March 1/2 & 8/9, 2014) well ahead of the L-NP (43%, unchanged) on a two-party preferred basis. Support amongst men now favours the ALP 52.5% (up 3.5%) cf. L-NP 47.5% (down 3.5%).

Analysis by States

The ALP leads in Australia's three largest States. NSW: ALP (54.5%) cf. L-NP (45.5%), Victoria: ALP (55%) cf. L-NP (45%) and Queensland: ALP (56.5%) cf. L-NP (43.5%).

In Western Australia the ALP (52%) leads the L-NP (48%) only two weeks before Western Australia votes in a special half-Senate election on April 5. The ALP also leads narrowly in South Australia and leads in Tasmania after both States elected new State Governments during the surveying period.

Roy Morgan Government Confidence Rating

The Roy Morgan Government Confidence Rating has risen to 100 (up 5pts). Now 41.5% (up 3.5%) of Australians say Australia is 'heading in the right direction' and 41.5% (down 1.5%) say Australia is 'heading in the wrong direction'.

The Morgan Poll surveys a larger sample (including people who only use a mobile phone) than any other public opinion poll.

Gary Morgan says:

"The ALP (54.5%, up 1% since March 1/2 & 8/9, 2014) has increased its strong lead over the L-NP (45.5%, down 1%) on a two-party preferred basis after both South Australia and Tasmania elected new State Governments during the last two weeks.

"Crucially, the ALP (52%) now leads the L-NP (48%) on a two-party preferred basis in Western Australia as West Australians prepare to vote for a new half-Senate in under two weeks.

"The Abbott Government is again campaigning on removing the Mining Tax and the Carbon Tax – both big issues in Western Australia while Opposition Leader Bill Shorten is urging West Australians to provide a judgment on the first six months of the Abbott Government, while also warning WA electors not to give the Abbott Government a 'rubber stamp' in the Senate to cut education and healthcare funding.

“Although the Liberals were favoured to win both State Elections, South Australian Labour Premier Jay Weatherill hung on despite polling only about 47% of the two-party preferred vote and has now gained the support of Independent Geoff Brock to form a minority Government.

“In contrast there was a strong swing to the Liberals (51.4%, up 12.4%) in Tasmania and large swings away from both the ALP (27.4%, down 9.5%) and the Greens (13.5%, down 8.1%). These results meant Liberal Leader Will Hodgman is the new Premier of Tasmania – the State’s first Liberal Premier since 1998.”

Electors were asked: *“If an election for the House of Representatives were held today - which party will receive your first preference?”* Visit the [Roy Morgan Online Store](#) to browse our range of [Voter Profiles by electorate](#), detailed [Voting Intention Demographics Reports](#) and [Most important Political Issue Reports](#) (all 150 electorates ranked by an issue).

Finding No. 5504 - This multi-mode Morgan Poll on Federal voting intention was conducted via SMS and face-to-face interviewing on the weekends of March 15/16 & 22/23, 2014 with an Australia-wide cross-section of 2,909 Australian electors aged 18+, of all electors surveyed 2% (unchanged) did not name a party.

Phone: Telephone survey method; Face: Face-to-face survey method. *Roy Morgan GCR = Roy Morgan Government Confidence Rating (100 plus the difference between the percentage of people who say the country is “going in the right direction” and the percentage who say the country is “going in seriously the wrong direction”).

Margin of Error

The margin of error to be allowed for in any estimate depends mainly on the number of interviews on which it is based. The following table gives indications of the likely range within which estimates would be 95% likely to fall, expressed as the number of percentage points above or below the actual estimate. The figures are approximate and for general guidance only, and assume a simple random sample. Allowance for design effects (such as stratification and weighting) should be made as appropriate.

Sample Size	Percentage Estimate			
	40%-60%	25% or 75%	10% or 90%	5% or 95%
500	±4.5	±3.9	±2.7	±1.9
1,000	±3.2	±2.7	±1.9	±1.4
1,500	±2.6	±2.2	±1.5	±1.1
2,000	±2.2	±1.9	±1.3	±1.0

Morgan Poll Accuracy — Recent Elections State & Federal (2006 – 2013)

The Morgan Poll has proven to be consistently the most accurate regular poll in recent Australian Elections — including the 2013 Federal Election, 2010 Federal Election, 2007 Federal Election, 2010 Victorian State Election & 2012 Queensland State Election.

The **Morgan Poll** was the most accurate of all polling companies at [the 2013 Federal Election](#) for the two-party preferred vote (L-NP: 53.5% cf. ALP 46.5%) (sample 4,937 electors).

The **Morgan Poll** was the most accurate of all polling companies at [the 2007 Federal Election](#) for both primary vote and two-party preferred predictions (sample 2,115 electors).

The **Morgan Poll** accurately predicted [that the ALP would win the 2006 Queensland Election with a reduced majority](#) (sample 604 electors).

The **Morgan Poll** accurately predicted [that the ALP would win the 2006 Victorian Election with a reduced majority](#) (sample 956 electors). The **Morgan Poll** was also the most accurate on the primary vote of the major parties for the Victorian election.

Note: The [discussion on Possum Pollytics](#) regarding Morgan and Newspoll is well worth reading.

The following included comment says it all: “I find it interesting that for the only poll in the last five years for which there is any ‘real’ figure with which to compare, i.e. the polls immediately before the 2004 election, Morgan (45.5%) was closer to the actual Coalition Primary (46.7%) than Newspoll (45%) or Nielsen (49%), and Morgan (38.5%) was also closer to the ALP actual primary (37.6%) than Newspoll (39%), and only marginally further away than Nielsen (37%). Since we have no idea of how far away the ongoing polls are from ‘reality’ (whatever that means), surely we should just go with what we know, that in the most recent testable case, Morgan was better at forecasting the actual primary vote than Newspoll. On what possible basis should we decide that the Newspoll or Nielsen primary vote estimate is ‘better’ than Morgan’s.”
