ALP (52.5%) increases lead over L-NP (47.5%) after Holden decision to cease manufacturing cars in 2017 and Roy Morgan Government Confidence lowest since Federal Election

On a two-party preferred basis the ALP is 52.5%, up 1% since the Morgan Poll of November 30/ December 1, 2013. L-NP support is 47.5%, down 1%. If an election were held now the result would be an ALP victory according to the Morgan Poll. This multi-mode Morgan Poll on voting intention was conducted over the last two weekends (December 7/8 & 14/15, 2013) with an Australia-wide cross-section of 2,879 Australian electors aged 18+.

The L-NP primary vote is 40.5% (down 1%) just ahead of the ALP primary vote at 38.5% (unchanged).

Among the minor parties Greens support is 10% (up 1.5%), support for the Palmer United Party (PUP) is 3.5% (unchanged) and support for Independents/Others is 7.5% (down 0.5%). Support for PUP is still clearly highest in Clive Palmer's home State of Queensland (5.5%).

Analysis by Gender

Analysis by Gender shows this week's rise in support for the ALP has come from women with the ALP (58%, up 4% since November 30/ December 1, 2013) now well ahead of the L-NP (42%, down 4%) amongst women on a two party preferred basis. However, support amongst men for the two major parties is little changed with men still favouring the L-NP 53% (up 1.5%) cf. ALP 47% (down 1.5%).

Roy Morgan Government Confidence Rating

The Roy Morgan Government Confidence Rating has fallen to 103.5 (down 9.5pts since November 30/ December 1, 2013) and now at its lowest point since the recent Federal Election. Now 42% (down 6%) of Australians say Australia is 'heading in the right direction' and 38.5% (up 3.5%) say Australia is 'heading in the wrong direction'.

The Morgan Poll surveys a larger sample (including people who only use a mobile phone) than any other public opinion poll.

Gary Morgan says:

"The ALP (52.5%, up 1% over the past two weeks) has increased its lead over the L-NP (47.5%, down 1%) on a two-party preferred basis after Holden's decision to cease manufacturing in Australia in 2017 was announced last week. Last week also saw the Abbott Government's successful High Court challenge to the ACT's same-sex marriage laws which were struck down by the High Court as inconsistent with the Federal marriage legislation.

"It is important to note that the rise in ALP support has come entirely from women with women now heavily favouring the ALP (58%, up 4%) over the L-NP (42%, down 4%) on a two-party preferred basis however men still favour the L-NP (53%, up 1.5%) over the ALP (47%, down 1.5%).

"Worryingly for the Abbott Government, which reached 100 days in office today, the Roy Morgan Government Confidence Rating has 'crashed' to 103.5pts (down 9.5pts) and is now at its lowest since the Coalition won the recent Federal Election. Treasurer Joe Hockey is due to deliver the Mid Year Economic and Fiscal Outlook (MYEFO) tomorrow which is believed to contain further bad news about the state of the Federal Budget. The Government will hope that the bad news of the last few weeks will be long forgotten when Parliament resumes in mid-February 2014."

Electors were asked: "If an election for the House of Representatives were held today - which party will receive your first preference?" Visit the [Roy Morgan Online Store](#) to browse our range of [Voter Profiles by electorate](#), detailed [Voting Intention Demographics Reports](#) and [Most important Political Issue Reports](#) (all 150 electorates ranked by an issue).

Finding No. 5353 - This multi-mode Morgan Poll on Federal voting intention was conducted via SMS and face-to-face interviewing on the weekends of December 7/8 & 14/15, 2013 with an Australia-wide cross-section of 2,879 Australian electors aged 18+, of all electors surveyed 1% (unchanged) did not name a party.

Phone: Telephone survey method; Face: Face-to-face survey method. *Roy Morgan GCR = Roy Morgan Government Confidence Rating (100 plus the difference between the percentage of people who say the country is “going in the right direction” and the percentage who say the country is “going in seriously the wrong direction”).

Margin of Error

The margin of error to be allowed for in any estimate depends mainly on the number of interviews on which it is based. The following table gives indications of the likely range within which estimates would be 95% likely to fall, expressed as the number of percentage points above or below the actual estimate. The figures are approximate and for general guidance only, and assume a simple random sample. Allowance for design effects (such as stratification and weighting) should be made as appropriate.

Sample Size	Percentage Estimate			
	40%-60%	25% or 75%	10% or 90%	5% or 95%
500	±4.5	±3.9	±2.7	±1.9
1,000	±3.2	±2.7	±1.9	±1.4
1,500	±2.6	±2.2	±1.5	±1.1
2,000	±2.2	±1.9	±1.3	±1.0

Morgan Poll Accuracy — Recent Elections State & Federal (2006 – 2013)

The Morgan Poll has proven to be consistently the most accurate regular poll in recent Australian Elections — including the 2013 Federal Election, 2010 Federal Election, 2007 Federal Election, 2010 Victorian State Election & 2012 Queensland State Election.

The **Morgan Poll** was the most accurate of all polling companies at [the 2013 Federal Election](#) for the two-party preferred vote (L-NP: 53.5% cf. ALP 46.5%) (sample 4,937 electors).

The **Morgan Poll** was the most accurate of all polling companies at [the 2007 Federal Election](#) for both primary vote and two-party preferred predictions (sample 2,115 electors).

The **Morgan Poll** accurately predicted [that the ALP would win the 2006 Queensland Election with a reduced majority](#) (sample 604 electors).

The **Morgan Poll** accurately predicted [that the ALP would win the 2006 Victorian Election with a reduced majority](#) (sample 956 electors). The **Morgan Poll** was also the most accurate on the primary vote of the major parties for the Victorian election.

Note: The [discussion on Possum Pollytics](#) regarding Morgan and Newspoll is well worth reading.

The following included comment says it all: “I find it interesting that for the only poll in the last five years for which there is any ‘real’ figure with which to compare, i.e. the polls immediately before the 2004 election, Morgan (45.5%) was closer to the actual Coalition Primary (46.7%) than Newspoll (45%) or Nielsen (49%), and Morgan (38.5%) was also closer to the ALP actual primary (37.6%) than Newspoll (39%), and only marginally further away than Nielsen (37%). Since we have no idea of how far away the ongoing polls are from ‘reality’ (whatever that means), surely we should just go with what we know, that in the most recent testable case, Morgan was better at forecasting the actual primary vote than Newspoll. On what possible basis should we decide that the Newspoll or Nielsen primary vote estimate is ‘better’ than Morgan’s.”
