

Thursday, 16 April 2015

L-NP support increases after PM Abbott commits to sending Australian troops to Iraq

L-NP support increased to 46.5% (up 2.5%), however still clearly behind the ALP 53.5% (down 2.5%) on a two-party preferred basis. If a Federal Election were held now the ALP would win according to this week's Morgan Poll on voting intention conducted over the last two weekends, February 28/March 1 & 7/8, 2015, with an Australia-wide cross-section of 3,182 Australian electors aged 18+.

Primary support for the L-NP increased to 39% (up 1.5%) now just ahead of the ALP 38% (down 2.5%). Support for the other parties shows The Greens at 11.5% (up 1.5%), Palmer United Party (PUP) 2% (unchanged) while Independents/ Others were down 0.5% to 9.5%.

Support for PUP is highest in Clive Palmer's home State of Queensland (4%) with little support in all other states.

Roy Morgan Government Confidence Rating

The Roy Morgan Government Confidence Rating is up to 94pts (up 4pts) this week with 43.5% (down 1%) of Australians saying Australia is 'heading in the wrong direction' and 37.5% (up 3%) saying Australia is 'heading in the right direction'.

Analysis by Gender

Analysis by Gender now shows support higher for the ALP amongst women: ALP 56% (down 0.5%) cf. L-NP 44% (up 0.5%). Support amongst men is divided - 50% support for both major parties.

Analysis by Age group

Analysis by Age group shows the ALP still with its strongest advantage among younger Australians. 18-24yr olds heavily favour the ALP 63.5% cf. L-NP 36.5%; 25-34yr olds also heavily favour the ALP 60.5% cf. L-NP 39.5%; 35-49yr olds favour the ALP 54% cf. L-NP 46%; 50-64yr olds ALP 55.5% cf. L-NP 44.5%; and those aged 65+ still heavily favour the L-NP 59.5% cf. ALP 40.5%.

Analysis by States

The ALP maintains a two-party preferred lead in all Australian States except South Australia. Tasmania: ALP 62% cf. L-NP 38%; Victoria: ALP 58% cf. L-NP 42%; Queensland: ALP 52.5% cf. L-NP 47.5%; Western Australia: ALP 53% cf. L-NP 47%; New South Wales: ALP 51% cf. L- NP 49% and South Australia L-NP 55.5% cf. ALP 44.5%.

The Morgan Poll surveys a larger sample (including people who only use a mobile phone) than any other public opinion poll. The Morgan Poll asks Minor Party supporters which way they will vote their preferences. *News Corp's poll does not measure or reference the PUP vote!

The Morgan Poll allocated preferences based on how people say they will vote – allocating preferences by how electors voted at the last Federal Election, as used by News Corp's poll* shows the ALP (53.5%) cf. L-NP (46.5%) – for trends see the Morgan Poll historic data table.

Gary Morgan says:

"The L-NP 46.5% (up 2.5%) has significantly cut the strong lead of the ALP 53.5% (down 2.5%) on a two-party preferred basis this week after Prime Minister Tony Abbott committed to sending 300 Australian troops to Iraq to help train the Iraqi army in its fight against the Islamic State (ISIS).

"<u>The Morgan Poll</u> has consistently shown a short-term boost to Prime Ministers that commit Australian forces to international battlefields. However, this 'rallying around the Flag' and increase of support is not maintained unless the troop commitments are judged as a success.

"The troop deployment was initially flagged during a joint press conference with New Zealand Prime Minister John Key – New Zealand is itself sending around 140 troops to participate in the training missions – and confirmed last week after Abbott consulted Cabinet and backbenchers.

"Abbott claims that sending the 300 troops is 'not mission creep, it's the successful execution of the original mission'. However, Abbott has thus far failed to clearly outline what will constitute a successful deployment for the troops claiming that 'I'm not going to be too prescriptive at this stage. What we want to do is help to train an effective Iraqi regular army'."

Electors were asked: "If an election for the House of Representatives were held today – which party will receive your first preference?"

Visit the Roy Morgan Online Store to browse our range of <u>Voter Profiles</u> by electorate, detailed <u>Voting Intention Demographics Reports</u> and <u>Most important Political Issue Reports</u> (all 150 electorates ranked by an issue).

Finding No. 6111– This multi-mode Morgan Poll on Federal voting intention was conducted via face-to-face and SMS interviewing over the last two weekends, February 28/ March 1 & 7/8, 2015 with an Australia-wide cross-section of 3,182 Australian electors aged 18+, of all electors surveyed 2.5% did not name a party.

Australia Heading In "Right" Or "Wrong" Direction

Electors were asked: "Generally speaking, do you feel that things in Australia are heading in the right direction or would you say things are seriously heading in the wrong direction?"

Phone: Telephone survey method; Face: Face-to-face survey method. *Roy Morgan GCR = Roy Morgan Government Confidence Rating (100 plus the difference between the percentage of people who say the country is "going in the right direction" and the percentage who say the country is "going in seriously the wrong direction").

Margin of Error

The margin of error to be allowed for in any estimate depends mainly on the number of interviews on which it is based. The following table gives indications of the likely range within which estimates would be 95% likely to fall, expressed as the number of percentage points above or below the actual estimate. The figures are approximate and for general guidance only, and assume a simple random sample. Allowance for design effects (such as stratification and weighting) should be made as appropriate.

Comple Size	Percentage Estimate								
Sample Size	40%-60%	25% or 75% 10% or 90% 5% o							
500	±4.5	±3.9	±2.7	±1.9					
1,000	±3.2	±2.7	±1.9	±1.4					
1,500	±2.6	±2.2	±1.5	±1.1					
2,000	±2.2	±1.9	±1.3	±1.0					

Morgan Poll Accuracy — Recent Elections State & Federal (2006 – 2014)

The Morgan Poll has proven to be consistently the most accurate regular poll in recent Australian Elections — including the 2013 Federal Election, 2010 Federal Election, 2007 Federal Election, 2010 Victorian State Election & 2012 Queensland State Election.

The **Morgan Poll** was the most accurate of all polling companies at the 2013 Federal Election for the two-party preferred vote (L-NP: 53.5% cf. ALP 46.5%) (sample 4,937 electors).

The **Morgan Poll** was the most accurate of all polling companies at <u>the 2007 Federal</u> <u>Election</u> for both primary vote and two-party preferred predictions (sample 2,115 electors).

The **Morgan Poll** accurately predicted <u>that the ALP would win the 2006 Queensland Election with a reduced majority</u> (sample 604 electors).

The **Morgan Poll** accurately predicted <u>that the ALP would win the 2006 Victorian Election</u> <u>with a reduced majority</u> (sample 956 electors). The **Morgan Poll** was also the most accurate on the primary vote of the major parties for the Victorian election.

Note: The <u>discussion on Possum Pollytics</u> regarding Morgan and Newspoll is well worth reading.

The following included comment says it all: "I find it interesting that for the only poll in the last five years for which there is any 'real' figure with which to compare, i.e. the polls immediately before the 2004 election, Morgan (45.5%) was closer to the actual Coalition Primary (46.7%) than Newspoll (45%) or Nielsen (49%), and Morgan (38.5%) was also closer to the ALP actual primary (37.6%) than Newspoll (39%), and only marginally further away than Nielsen (37%). Since we have no idea of how far away the ongoing polls are from 'reality' (whatever that means), surely we should just go with what we know, that in the most recent testable case, Morgan was better at forecasting the actual primary vote than Newspoll. On what possible basis should we decide that the Newspoll or Nielsen primary vote estimate is 'better' than Morgan's."
