Confidence jumps

- Confidence jumped by 4% – one of the largest increases in a year. On an absolute level, the index is at a two-month high.
- Financial conditions indices were mixed, with current finances down 2.2%, while future financial conditions rose 1.0%.
- Economic conditions were up by a healthy margin. Current economic conditions gained 13.3% after falling for three consecutive weeks. Future economic conditions also showed strength, gaining 7.0%, a rise that came after four straight weekly losses.
- The ‘Time to buy a major household item’ was up 3.2%, taking it close to the levels seen last July. The four-week moving average for inflation expectations was stable at 3.9%, although the weekly reading fell to 3.7%.

ANZ-Roy Morgan Consumer Confidence and inflation expectations

Last week (29–30 Jun)	Weekly change, %	Four-week average	Monthly average since 1990	Inflation expectations (four-week ma)
118.9	4.0%	115.5	113.1	3.9%

Data collected last weekend (Saturday and Sunday), based on around 1,000 face-to-face interviews. Not seasonally adjusted. Further data history on page 6.

ANZ Head of Australian Economics, David Plank, commented:

“Confidence was up by a healthy margin on the back of a strong performance by the economic conditions sub-indices. The strength may have reflected better global sentiment arising out of the G20 summit in Osaka and evidence that house prices are stabilising in Sydney and Melbourne. The further gain in the ‘time to buy’ index suggests sentiment toward housing is improving. The RBA decision on the cash rate may impact sentiment this week, though as we saw in June the immediate impact of a rate cut is not always positive.”

Confidence roars higher
