ANZ Head of Australian Economics, David Plank, commented:

The strong labour market recovery provided a boost to consumer confidence with the index gaining 1.3% last week. The unemployment rate fell to 5.1% in May, reaching its lowest level since February 2020 - that is, before the pandemic started. This strength in the employment data overshadowed news about the emergence of a COVID cluster in Sydney. Confidence in the city rose by 5.2%, while in the rest of New South Wales it gained 2.8%. We know from recent experience, however, that sentiment will likely be impacted negatively if the outbreak worsens and greater restrictions are imposed.
